

# **Creation (Genesis 1) -- Fisherman's Net (Computers)**

## **Option #3**

Not a complete lesson. This can be done in conjunction with the Temple Courtyard lesson, or as part of computer lesson options 1 or 2 if there is internet access.

Use Google or another search engine to locate websites that help kids find things they can do to help the planet. (These links change constantly, so none is listed here.) Allow kids to explore these options in pairs.

Discuss what they found as a group and come up with a group action plan. This could fold into recycling or dishwashing (reduce waste) programs at the church, or could fold into Youth Mission Week plans or projects.
